### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The examiner respectfully asserts that none of the prior art, taken either singly or in combination, is seen to teach or suggest the use of a protective comforter cover comprising top and bottom faces folded over to cover respectively opposed surfaces of a comforter wherein the top and bottom faces are attached together along a permanently closed edge and include an openable foot edge and side edges provided with *three* distinct fastening closure mechanisms: a zipper (disposed along the side edges of each top and bottom face), a flap (disposed along each of the respective openable foot edges of the top and bottom faces) and triangular pockets *provided in two corners of the top face bordering the openable foot edge thereof to contain the corners bordering the openable foot edge of the bottom face*, as explicitly recited in Applicant's sole independent claim 10. With regards to the prior art, most conventional protective comforter covers comprise a simple rectangular envelope structure having a closed edge and fastening mechanisms disposed along three open edges, as opposed to the use of pockets formed in the corners of one face bordering the open edge distal to the closed edge which hold the corners of the corresponding open edge of the other face as recited by Applicant. Hence, it is considered that the application is currently in proper condition for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
